

CERASTUC Jafep.

Technical specification

DESCRIPTION

Water-based emulsion, as a gel, which is liquefied by mixing. Specially developed as a stucco protector. It provides excellent gloss finish, good resistance to abrasion and to water, and high flexibility. Good resistance to polishing.

TECHNICAL CHARACTERISTICS:

Nature: Emulsion wax.
Colour: Whitish
Viscosity: Thyrotrophic Gel
Coverage: 30-40 m²/ kg.
Thinning: Water
PH: 8.5-9.5.
Product susceptible to frost.

APPLICATION

Stucco protector wax. It could be polished.

The practical spreading rate will depend on the actual dry film thickness, the nature of the substrate and the application method.

INSTRUCTIONS FOR USE

Even if it is not common, in general it should be thinned down (till even 50%). Apply at least two coats and polish the last coat.

SUBMITTALS

Plastic packaging: 750 mL.
