

UNIVERSAL SOLVENT

Technical information

DESCRIPTION

Mixture of solvents. As its name indicates it is suitable for most solvent based paints.

TECHNICAL CHARACTERISTICS

Nature: Mixture of aromatics, alcohols, ketones and acetates.

Colour: Colourless.

Appearance: Transparent liquid.

Specific weight: $0.90 \pm 0.05 \text{ gr./cm}^3$.

Ignition Temperature: 2.5 °C Method: UNE-EN 456

OBSERVATION

Store completely sealed in its original container under cover and at a temperature of between 5 and 35 °C. Store in ventilated warehouses sheltered from high and low temperatures. Use suitable individual protective measures (masks, goggles, gloves).

Avoid the exposure of containers to high temperatures.

APPLICATION

Viscosity regulator to be applied to the following paints: primers, quick drying enamels, chlorinated rubber paints, coloured and transparent nitrocellulose lacquers. Specifically designed for spray application. For brush or roller application and for cleaning tools used with the abovementioned products.

SUBMITTALS

Metal containers of: 1 Litre; 5 Litres; 20 Litres
