

SOLVENT BASED PENETRATIVE SEALER

Technical information

DESCRIPTION

Product with excellent penetration and fixing power. Very good adhesion, high resistance to alkalinity and quick drying.

TECHNICAL CHARACTERISTICS

Nature: Acrylic.

Appearance: Colourless or Transparent.

Density: 0.80 gr./cm³ (approximately).

Drying: 1 hour. Ready for painting in 24 hours.

Application: Brush, roller.

Performance: Varies greatly depending on the state of the surfaces.

Viscosity: 12 seconds (Ford Cup N° 4).

Wipedown: Jafep Synthetic Solvent.

APPLICATION

Especially suitable for sealing building materials in poor condition and suitable for sealing paints and previous coats. For interior or exterior application.

INSTRUCTIONS FOR USE

Remove the content of the container properly and apply as shown using a brush or roller. Avoid extreme temperatures and high levels of humidity.

Prior to application brush and scrape sand, cement or previous coats of paintwork that have not bonded well.

SUBMITTALS

Metal containers of: 5 Litres; 20 Litres
