

"R" SYNTHETIC PRIMER

Technical information

DESCRIPTION

Quick drying satin synthetic primer for providing primary protection to iron and steel surfaces. Very good adhesion and resistance.

TECHNICAL CHARACTERISTICS

Nature: Alkydic Resins
Colour: Rust Red, Grey and others to order.
Appearance: Satin
Density: 1.30 - 1.40 gr./cm³ depending on colour.
Drying: 15 minutes.
Diluent: JAFEP Universal Solvent.
Application: Essentially in a spray, airless spray,
Performance: 6 - 8 m²/kg.
Second coat: 24 hours.

APPLICATION

For protecting both interior and exterior ferrous surfaces in the form of a first coat for subsequent finishing using industrial or decorative enamels.

INSTRUCTIONS FOR USE

Dilute the product as appropriate according to the application system and apply using thin coats on surfaces that have been degreased, with the rust removed, and that are clean and dry. If the surface is still rusty or the paintwork is in poor condition, the rust or paintwork should be removed by sanding or brushing.

SUBMITTALS

Metal containers of: 4 Litres; 15 Litres
