

Ficha Técnica

PAINT REMOVER

Descripción

Thixotropic gel. Strips water based paint, acrylic distempers, normal emulsion paints (not non-drip), coverings, etc.

Datos técnicos

Datos de identificación del producto

Color	Blue
Aspecto	Thixotropic gel
Peso específico	1.05 + 0.05 gr./cm ³

Dónde aplicarlo

Brush, roller.

Ready to use. Remove the content of the container. Apply the product using a brush or roller and leave for between 15 minutes and 2 hours depending on the surface and thickness. Once the paint is removed, scrape and rinse with water. Sometimes it is necessary to repeat this operation if there is more than one layer of paint or it is a different type. Clean the utensils with water after use.

Formatos

Plastic containers of: 750 ml; 4 Litres; 15 Litres
