

Ficha Técnica

POLIMUL 202

Descripción

Liquid latex in plastified vinyl acetate base, high gloss and excellent resistance to weather.

Datos técnicos

Datos de identificación del producto

Aspecto Gloss.

Datos de aplicación del producto

Diluyente Water.

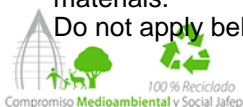

Secado 1 to 3 hours depending on base and thickness applied.

Dónde aplicarlo

Brush, roller or spray.

Especially suitable for sealing porous surfaces (concrete, plaster, etc.) and as a strengthening layer on emulsions, front facing bricks, coverings, etc. Achieving a very decorative and glossy finish, which increases the water resistance of those materials.

Do not apply below 3 °C.

Formatos

Plastic containers of: 1 Litre; 5 Litres; 50 Litres
