Datos técnicos

Datos de identificación del producto

Color	Black
Naturaleza	Water based synthetic polymer

Datos de aplicación del producto

Rendimiento	Up to 15 m ² /litre depending on surface
Secado	3 hours approximately

Productos relacionados

Water-based Rust Neutralizer. Clear.
Anti-corrosive Metal Varnish

Modo de empleo

The product must be applied on rusty surfaces.

Clean of oil and grease and remove loose particles with a brush. Apply a single thin layer without excess, preferably with a brush to facilitate penetration, although a roller or spray gun are also valid.

The reaction time is about 3 hours after which the treated surface takes on a bluish-black color and is ready to be painted.

This product is not a paint, so no more than 48 hours should pass without applying a suitable paint.

Formatos

Containers: 250 & 750 ml
